JDE Release Insights April 26 Update (9.2.26.2)

News from the Learning Hub

- Applications
- Tools
- System Administration
- Process Modeler

6

Reverse Ship Confirm Flow

Sales Order Management

- Revert ship-confirmed sales order lines to their pre-shipped state
 - Restoring inventory stock
 - Restating commitments

Benefit

- Easily reverse ship confirmations for sales order transactions
- Minimize the effort and overhead associated with manual corrections

steltix

7

Release Held Orders Regardless of Total Exposure

Sales Order Management

- Enhancement to Batch Release Credit Hold (R42550)
- Release a portion of held orders, up to a cumulative amount that does not exceed the credit limit even if a customer's total exposure exceeds its credit limit

Benefit

- Smoother order fulfilment process

steltix

8

Enable Processing of Zero Commission Records

Sales Order Management

- Enter, track, and update zero or blank commission records throughout the sales order process.

Benefit

- Complete management of zero-commission records
- Monitor sales staff or groups with zero commissions for performance evaluation
- Assess their eligibility for additional commissions based on order volumes during various reporting periods

9

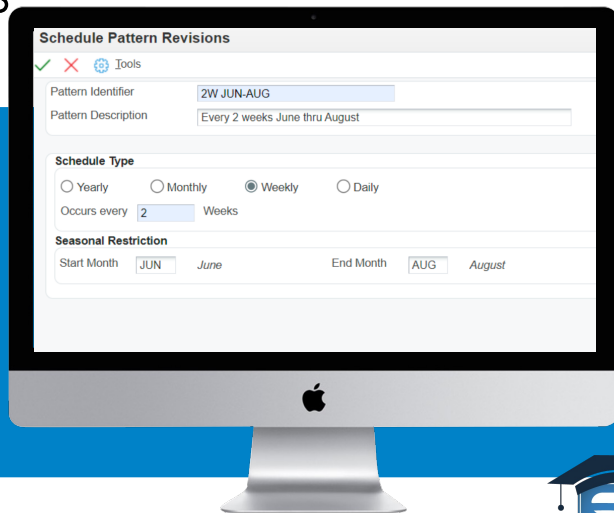

Schedule Preventive Maintenance Based on User Preferences

Capital Asset Management

- New Schedule Patterns Program P12072
- Set up user-defined frequency codes (yearly, monthly, daily, seasonal)

Benefits

- Control and align the maintenance plans with your unique operational and seasonal requirements.

10

JDE Release Insights Applications Summary

SCM / CAM

-  Reverse Ship Confirm Flow
-  Release Held Orders Regardless of Total Exposure
-  Enable Processing of Zero Commission Records
-  Schedule Preventive Maintenance Based on User Preferences

11

JDE Release 26 Insights April 26 Update

News from the Learning Hub
Applications

-  Tools
-  System Administration
-  Process Modeler

12

JDE Release Insights Tools

Orchestrator

- Iterate over Forms in a Form Request
 - One or multiple Forms could be repeated or skipped within one Form Request
 - Sample: Release a requisition order to a purchase order, a form is repeated for each detail line item
- Pass Exception Messages from Failed Steps into Orchestration Variables
 - Failure Data is available to subsequent orchestration steps
 - External REST API fails, pass the response to a subsequent rule, which then could direct the orchestration to run on an alternate path
- Oracle Guided Learning for Orchestrator Studio

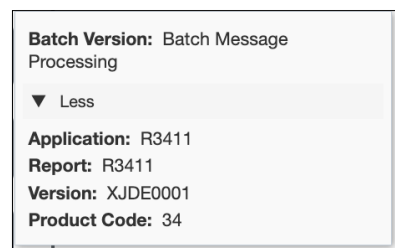

13

JDE Release Insights Tools

Improved Hover Experience on EnterpriseOne Pages

- **User** Preference setting to enable or disable hover information
- Two-second delay before hover information appears (reduce the noise when you move over a page)
- Condensed information with an option to drill down

14

JDE Release Insights Tools

User Experience / Forms

- Form Extensions for Power Edit Forms: Data Extensibility
 - Add data items to the power edit form and its sub-forms
- Form Extensions and Personal Forms: Alignment of Controls
 - Precisely Align controls vertically and horizontally on a form by using crosshairs

15

JDE Release Insights Tools Summary

Orchestrator

- Iterate over Forms in a Form Request
- Pass Exception Messages from Failed Steps into Orchestration Variables
- Oracle Guided Learning for Orchestrator Studio

Composed Pages

- Improved Hover Experience on EnterpriseOne Pages

User Experience / Forms

- Form Extensions for Power Edit Forms: Data Extensibility
- Form Extensions and Personal Forms: Alignment of Controls
